🔗 My Portfolio

## Profile

---

I am an innovative Full Stack Developer with a strong ability to collaborate effectively and communicate clearly within teams. Known for exceptional attention to detail and a proactive approach to a strong problem-solving skills. Demonstrates excellent teamwork skills while also thriving in independent work environments while delivering clean scalable and maintainable code.

## Education

---

### Software Engineering/ Computer Science

2018 – 2023

*Bachelor's Degree in Information Technology Engineering*

- Algorithms, Complexity Theory and Data Structures.
- Software lifecycle, databases and operating systems.
- Average grad is Good

## Experience

---

### Fullstack Developer - Lifesmile

Dec 2023 – present

- Developing the e-commerce store for the brand on all platforms (web and mobile) using React and React Native, and building a custom CMS dashboard to control the content of the store, manage orders, sending notifications, and many other features.
- Integrating multiple payment methods like card, Apple Pay, Google Pay, Tabby to streamline the customer checkouts.
- Deploying the mobile application on both iOS and Android stores, and continuously updating it to fix any issues.

### Frontend Developer - Aratech

Oct 2021 – Dec 2023

- Working on building Frontend mobile and web applications using React, React Native as well as helping in the development of Back-End features using Express.js to create high-performance, and user-friendly applications.
- Building RESTful APIs, and designing the backend functionality to ensure security and scalability.
- Collaborating with a team, and working with Git version control for CI/CD system to distribute tasks effectively and facilitate code reviews.

## Projects

---

### Lifesmile

*React.js*

- I was responsible for developing Lifesmile ecommerce website using Next.js as a Full-Stack framework.
- Leveraging the latest features of server side rendering (SSR) to improve SEO and enhance performance.
- Ensured responsiveness and seamless user experience throughout all pages.
- Working with Google Cloud Services to integrate google maps for address selection feature inside the application

## Custom CMS Dashboard

*Next.js*

- Creating the dashboard using Next.js as a Fullstack framework (next Integrated api routes).
- Using Amazon Web Service S3 as a CDN to store images and ensure fast connectivity and reliability.
- Deployed mySQL database to AWS RDS and used Prisma ORM to build schema and query the database.
- Implementing CMS functionality like adding, updating and deleting items, custom notifications, controlling orders and many other features.
- Authentication and Authorization using JWT tokens to forbid unauthorized access.

## Sarayu

*React.js*

- Developed using React, Following the component-based architecture by designing modular and reusable React component while following Frontend best practices.
- Managing the global state using Redux to ensure smooth sharing of data across components avoiding props drilling

## Marketedia

*React.js*

- Marketing website developed using React, with high attention to deliver a responsive design, high performance and catching UI/UX.
- Used Context-API to apply theming feature(dark theme/ light theme) to match user preferences.

## Lifemile Shopping (iOS, Android)

*React Native*

- Leading the development of the mobile application using React Native for the Frontend and Next for the Backend.
- The State Management of the application is built with Redux and we used Redux Thunk for backend integration.
- Constructing the application with Expo managed workflow and using EAS (Expo Application Service) to build and publish updates.

## SouKare (IOS, Android )

*React Native*

- Developed the application using React Native for the Frontend and Express.js for the Backend.
- Building the application using React Native Cli and handled native modules to create features such as notifications and deep linking.
- Triggering scheduled push notifications using Firebase for marketing reasons.
- Enabled deep linking, allowing web links to be redirected and opened through the mobile application.

## Technical Skills

---

Next.js | React.js | Typescript | React Native | Javascript | Tailwind css | Redux |  
Material-UI | MySQL | MongoDB | Node.js | Prisma | Firebase | Expo | Nest.js |  
Express.js | problem-solving | AWS cloud services | Git version control |  
Database Systems | SAAS | REST API | iOS/Android Deployment | Debugging

## Languages

---

Arabic • English • German
