🔗 My Portfolio

Profile

I am an innovative Full Stack Developer with a strong ability to collaborate effectively and communicate clearly within teams. Known for exceptional attention to detail and a proactive approach to a strong problem-solving skills. Demonstrates excellent teamwork skills while also thriving in independent work environments.

Education

Software Engineering/ Computer Science   2018 – 2023

Bachelor's Degree in Information Technology Engineering

- Algorithms, Complexity Theory and Data Structures.
- Software lifecycle, databases and operating systems.
- Average grad is Good

Professional Experience

FullStack Developer - Aratech   Oct 2021 – Dec 2023
                                                      Dubai, UAE

- Working on building Frontend mobile and web applications using React, React Native as well as helping in the development of Back-End features using Express.js to create high-performance, and user-friendly applications.
- Building RESTful APIs, and designing the backend functionality to ensure security and scalability.
- Collaborating with a team, and working with Git version control system to distribute tasks effectively and facilitate code reviews.

Fullstack Developer - Lifesmile   Nov 2023 – present
                                                       Dubai, UAE

- Developing the ecommerce store for the brand on all platforms (web and mobile) using React and React Native, and building a custom CMS dashboard to control the content of the store, manage orders, sending notifications, and many other features.
- Integrating multiple payment methods like card, Apple Pay, Google Pay, Tabby to streamline the customer checkouts.
- Deploying the mobile application on both iOS and Android stores, and continuously updating it to fix any issues.

Projects

SouKare (IOS, Android) ⬈

Mobile app

- Developed the application using React Native for the Frontend and Express.js for the Backend.
- Building the application using React Native Cli and handled native modules to create features such as notifications and deep linking.
- Triggering scheduled push notifications using Firebase for marketing reasons.

- Enabled deep linking, allowing web links to be redirected and opened through the mobile application.

Lifesmile Shopping (iOS, Android) ↗

Mobile App

- Leading the development of the mobile application using React Native for the Frontend and Next for the Backend.
- Managing the state of the application with Redux and integrating with backend using Redux Thunk.
- Constructing the application with Expo managed workflow and using EAS (Expo Application Service) to build and publish updates.

Lifesmile ↗

Web

- I was responsible for developing Lifesmile ecommerce website using Next.js as a Full-Stack framework.
- Leveraging the latest features of server side rendering (SSR) to improve SEO and enhance performance.
- Ensured responsiveness and seamless user experience throughout all pages.
- Working with Google Cloud Services to integrate google maps for address selection feature inside the application

Custom CMS Dashboard

Web

- Creating the dashboard using Next.js as a Fullstack framework (next Inegrated api routes).
- Using Amazon Web Service S3 as a CDN to store images and ensure fast connectivity and reliability.
- Deployed mySQL database to AWS RDS and used Prisma ORM to build schema and query the database.
- Implementing CMS functionality like adding, updating and deleting items, custom notifications, controlling orders and many other features.
- Authentication and Authorization using JWT tokens to forbid unauthorized access.
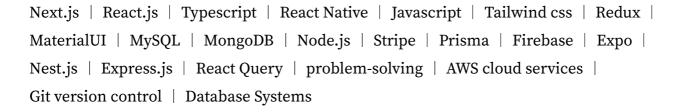

Sarayu ↗

Web

- Developed using React, Following the component-based architecture by designing modular and reusable React component while following Frontend best practices.
- Managing the global state using Redux to ensure smooth sharing of data across components avoiding props drilling

Marketedia ↗

- Marketing website developed using React, with high attention to responsiveness, performance and catching design.
- Used Context-Api to apply theming feature(dark theme/ light theme) to match user preferences.

Technical Skills

Next.js | React.js | Typescript | React Native | Javascript | Tailwind css | Redux |
MaterialUI | MySQL | MongoDB | Node.js | Stripe | Prisma | Firebase | Expo |
Nest.js | Express.js | React Query | problem-solving | AWS cloud services |
Git version control | Database Systems
