Profile

I am an innovative Full Stack Developer with a strong ability to collaborate effectively and communicate clearly within teams. Known for exceptional attention to detail and a proactive approach to problem-solving. Demonstrates excellent teamwork skills while also thriving in independent work environments.

Education

Software Engineering/ Computer Science   2018 – 2023
Bachelor's Degree in Information Technology Engineering

Professional Experience

FullStack Developer - Aratech   10/2021 – 12/2023 | Dubai, UAE
- Built full-stack mobile applications using React Native for the frontend and Express for the backend, creating seamless, high-performance, and user-friendly mobile experiences.
- Designed and implemented RESTful APIs to facilitate communication between frontend and backend systems.
- Collaborated with cross-functional teams of developers, designers, and product managers using Git/GitHub for version control and was responsible for code reviews and merging pull requests.

Fullstack Developer - Lifesmile   11/2023 – present | Dubai, UAE
- Developed a responsive website, dashboard, and mobile application using Next.js for the web and React Native for mobile.
- Integrated multiple payment methods like card paymets, Apple Pay, and Tabby (known in the UAE) to streamline customer checkouts.
- Deployed and monitored the application on both iOS and Android stores, publishing continuous updates.
- Configured automated WhatsApp messages and emails to clients to confirm their orders.

Projects

SouKare (IOS, Android) ⧉
- Developed the application using React Native for the frontend and Express for the backend.
- Built the application with React Native CLI and handled native modules to create features such as notifications and deep linking.
- applied scheduled push notifications using Firebase to remind users of medicine times.
- Enabled deep linking, allowing web links to be redirected and opened through the mobile application.

Lifesmile Shopping (iOS, Android) ⧉
- Led the development of the mobile application using React Native for the frontend and Express for the backend.
- Managed the state of the application with Redux and integrated with API requests using Redux Thunk.
- Constructed the application with Expo managed workflow and used EAS (Expo Application Service) to publish quick JavaScript bundle updates (EAS UPDATE).

Lifesmile.ae ⧉
- Contributed to the development of this website using Next.js v14 as a full-stack framework.
- Leveraged the latest features of server side rendering (SSR) to improve SEO and enhance performance.
- Utilized Prisma ORM to connect to a MySQL database and write effective and reliable queries.
- Ensured responsivness and seamless user experience throughout all pages.

Dashboard
- Created this dashboard using Next.js v13 as a full-stack framework.
- Used AWS S3 as a CDN to store website images and ensure fast service for clients.
- Deployed MySQL database to AWS RDS and connected it to the dashboard and website.
- Implemented e-commerce features like adding, updating, and deleting items, managing business WhatsApp through the dashboard, and more..
- Added authentication and role management to ensure maximum security.
